

CCR has focused recycling efforts on public sector accounts such as:

- School Districts
- Municipalities
- Cities
- Counties
- State Departments
- Depts. of Public Works
- Depts. Of Health
- Recycling Authorities
- Solid Waste Agencies

We also provide computer asset recovery and electronic recycling for corporate accounts as well.

CCR performs Department of Defense (DOD) hard drive wipe services for any of our clients requiring data to be wiped from hard drives.

CCR has yearly promotions for Earth Day, April 22-30th and America Recycles Day, Nov 15th-Nov 30th.

We participate in governmental planning to encourage national legislation on E-waste which will result in industry job creation by the hundreds for every state in the U.S.

We are amongst a few companies who have done extensive research and spoke the loudest about the economic and environmental impact the Analog-to-Digital TV switch COULD HAVE on the recycling industry if the U.S. plays their "hand" correctly.

CCR has earned national media attention for our efforts in trying to get the U.S. to be proactive with the Solid Waste Industry and TV manufacturers specifically on the topic of Analog TVs going in landfills. We feel the FCC-mandated switch to digital is an event that possesses the media power and public awareness momentum that will result in catapulting the E-waste Recycling Industry into the economic and environmental force it should be creating thousands of jobs and in making "RECYCLING" a household word.

- One of the Midwest's Price Leaders in Computer Recycling
- CCR Refurbishes, Reuses & Recycles Computers & Electronic Equipment
- CCR has a 0% Landfill Policy
- FREE Permanent Drop Off for Computer Electronics
- CCR offers \$\$ for Your Asset Disposal...Ask Us How!
- Certified Minority Business (MBE# 03238-2004-SM)
- EPA #9261635507 (IL)
- DEQ #MIK548775816 (MI)
- USDOT #1336761
- Issuance of Certificates of Recycling & Destruction
- Pollution Insurance Policy, Certificate of Liability Insurance & Hold Harmless

Classic Computer Recovery

Not enough Permanent Drop Off Sites?

Not enough recycling!

FCC Legislation requires all TVs in the U.S. to run on digital signal by FEBRUARY 17, 2009.

What will happen to all of the old analog televisions?

The PDO Problem

	Illinois	Michigan	Ohio	Wisconsin	Indiana
Total Counties	102	83	88	72	92
Public Sector¹ PDOs / PDOs that accept TVs	23/15	11/11	3/3	12/10	5/4
Conclusion Percentage	15/102	11.83%	3.88%	10/72	4.92%
	15%	13.30%	3.40%	13.90%	4.30%
PDOs² that do not accept E-waste³					
Public Sector	28	30	56	28	67
Private Sector ⁴	0	0	0	0	0
Total	28	30	56	28	67
PDOs that accept E-waste					
Public	25	17	9	13	9
Private	24	4	40	23	20
Total	49	21	49	36	29
From above, how many accept TVs					
Public	23	11	3	12	5
Private	24	4	22	16	10
Total	47	15	25	28	15
Charge Residents \$ / PDOs that accept TVs					
Public	10/23	6/11	1/3	10/12	2/5
Private	21/24	4/4	16/22	16/16	10/10
Total	31/47	10/15	17/25	26/28	12/15
Free to Residents / PDOs that accept TVs					
Public	13/23	5/11	2/3	2/12**	3/5
Private	3/24	0/4	6/22	0/16	0/10
Total	16/47	5/15	8/25	2/28	3/15
TDOs⁵ that collect E-waste					
Public	5	3	5	2	1
Private	0	0	0	0	0
Total	5	3	5	2	1
One Day⁶ collection events that accept E-waste (by County)					
Public	5 Counties	9 Counties	3 Counties	2 Counties	6 Counties
Private	0	0	0	0	0
Total	5	9	3	2	6
Counties / PDOs that collect everything	77/90	51/18	105/28	64/22	96/20
Non Profits⁷ that collect E-waste		apx. 50			2
How many of those collect TVs		7			1
Total # of counties that have E-waste collections in the form of PDO, TDO, One Day, or Private	30	27	21	17	22
Counties that have collections from the PUBLIC sector in the above counties	20	27	11	15	12

The Bottom Line: There aren't nearly enough Permanent Drop Off (PDO) sites for TV and Electronic recycling on a state by state basis in regards to the upcoming Analog to Digital switchover. Every County should have at least one PDO to assist in managing the volumes of TVs being disposed of over the next few years.

The Solid Waste TV Problem

Currently, there is no legislation currently preventing residents from throwing out their old analog TVs with their weekly garbage over the next few years.

Trucks will "tip" their loads into landfills with the lead-based hazardous material inherent in all analog TVs if the U.S. as a nation doesn't take an active role in preventing this from happening.

By promoting and establishing PDOs throughout the Midwest, CCR is advancing our industry and encouraging our nation to recycle ALL possible recyclables (paper, plastic, etc)

In anticipation of **one TV recycled from 25% of all households**, state and local governments, in cooperation with Private E-Waste Recyclers, **must prepare an infrastructure** to handle this volume.

1 out of 10 TVs is expected to come into the SOLID WASTE STREAM over the next three years beginning Nov. 2008. Thereafter, it is expected that 40% more will come out in 2012 and the balance of 30% in the two years following
